

Test scenarios

Spanish, Portuguese and English

Purpose

This document gives a repeatable test set for the Bookly take-home prototype. It covers the required multi-turn behavior, tool use, clarification, multilingual switching, checkout handoff and persistence-visible trace.

Environment

Start with **npm start** and open **http://localhost:3000/**. Use the landing widget at **http://localhost:3000/landing** to validate the customer-facing experience. Supabase and OpenAI are optional at runtime, but the final configured demo uses both.

Supabase data snapshot

Scenarios below use the non-personal data read from Supabase on 20 September 2026: 20 catalog books, 10 orders and 1 checkout. Reference records include **BK-1003** (The Midnight Library, shipped, DHL-BK1003), **BK-1004** (Sapiens, out_for_delivery, UPS-BK1004), **BK-1005** (The Little Prince, delivered, return eligible), **Verity** (USD 13.53, stock 10) and checkout **CHK-MU77SWL6** (payment_pending, tarjeta, USD 13.53). Personal fields were excluded.

Pass criteria

A scenario passes when the UI response matches the expected behavior, the trace reflects the intended decision, and no unsupported order, price, payment or return fact is invented.

Español

Run the same interaction in this language. Language switches must update both the bot response and visible interface copy.

ID	Scenario / precondition	Steps	Expected result
ES-0 1	Estado de pedido Sesión nueva; registro BK-1003	1. Escribir "¿Dónde está mi pedido?" 2. Responder "BK-1003"	El agente consulta Supabase y muestra The Midnight Library, estado shipped, DHL, tracking DHL-BK1003 y entrega estimada 21/09/2026.
ES-0 2	Devolución multi-turno Pedido elegible BK-1005	1. Escribir "Quiero devolver un libro" 2. Responder "BK-1005" 3. Responder "Está dañado"	El agente identifica The Little Prince, valida return_eligible=true, actualiza return_status=requested y confirma el caso.
ES-0 3	Búsqueda por categoría Sesión nueva; catálogo Amazon bestsellers	1. Pulsar "Buscar libros" 2. Elegir "Ficción"	El agente consulta bookly_books y muestra, entre otros, Verity (USD 13.53), Threshing Day (USD 17.48) y The Unselected Journals (USD 21.00), con stock disponible.
ES-0 4	Compra y cierre Verity visible; USD 13.53; stock 10	1. Pulsar "Comprar" 2. Completar datos de registro y pago 3. Escribir "Gracias"	El carrito conserva Verity; se crea un checkout USD 13.53 con status payment_pending. El cierre confirma la finalización sin afirmar que hubo cobro.
ES-0 5	Cambio explícito de idioma Conversación en portugués	Escribir "can we talk in english" o "cambia a inglés"	La respuesta siguiente es en inglés y la interfaz actualiza título, botones, placeholder y traza.

Português

Run the same interaction in this language. Language switches must update both the bot response and visible interface copy.

ID	Scenario / precondition	Steps	Expected result
PT-0 1	Status do pedido Sessão nova; registro BK-1004	1. Escrever "Onde está meu pedido?" 2. Responder "BK-1004"	O agente consulta Supabase e mostra Sapiens, status out_for_delivery, UPS, rastreio UPS-BK1004 e entrega estimada 19/09/2026.
PT-0 2	Devolução em várias etapas Pedido elegível BK-1005	1. Escrever "Quero devolver um livro" 2. Responder "BK-1005" 3. Responder "Está danificado"	O agente identifica The Little Prince, valida return_eligible=true, atualiza return_status=requested e confirma o caso.
PT-0 3	Busca por categoria Sessão nova; catálogo Amazon bestsellers	1. Pressionar "Buscar livros" 2. Escolher "Romance"	O agente consulta bookly_books e retorna Threshing Day (USD 17.48), Theo of Golden (USD 12.99) e A Court of Splintered Harmony (USD 22.40), todos com stock 10.
PT-0 4	Compra e encerramento Verity visível; USD 13.53; stock 10	1. Pressionar "Comprar" 2. Informar dados de registro e pagamento 3. Escrever "Obrigado"	O carrinho mantém Verity; cria-se um checkout USD 13.53 com status payment_pending. O encerramento confirma a conclusão sem afirmar cobrança.
PT-0 5	Troca explícita de idioma Conversa em português	Escrever "can we talk in english" ou "falar em inglês"	A próxima resposta é em inglês e a interface atualiza título, botões, campo de texto e rastreio.

English

Run the same interaction in this language. Language switches must update both the bot response and visible interface copy.

ID	Scenario / precondition	Steps	Expected result
EN-0 1	Order status New session; record BK-1003	1. Type "Where is my order?" 2. Reply "BK-1003"	The agent queries Supabase and shows The Midnight Library, shipped status, DHL, tracking DHL-BK1003 and ETA 21 Sep 2026.
EN-0 2	Multi-turn return Eligible order BK-1005	1. Type "I want to return a book" 2. Reply "BK-1005" 3. Reply "It is damaged"	The agent identifies The Little Prince, validates return_eligible=true, updates return_status=requested and confirms the case.
EN-0 3	Category search New session; Amazon bestsellers catalog	1. Press "Search books" 2. Choose "Fiction"	The agent queries bookly_books and returns examples such as Verity (USD 13.53), Threshing Day (USD 17.48) and The Unselected Journals (USD 21.00), with stock available.
EN-0 4	Purchase and closing Verity visible; USD 13.53; stock 10	1. Press "Buy" 2. Provide registration and payment data 3. Type "Thanks"	The cart keeps Verity; a USD 13.53 checkout is created with payment_pending. Closing confirms completion without claiming a charge.
EN-0 5	Explicit language switch Conversation in Portuguese	Type "can we talk in english" or "in English"	The next reply is in English and the UI updates its title, buttons, input placeholder and trace.

Coverage summary

The scenarios map directly to the SE Take-Home requirements and the implemented Bookly flows.

Requirement	Covered by	Status
Interactive demo	Web chat at / and /landing	Delivered
Multi-turn interaction	ES-01, ES-02, PT-01, EN-02	Delivered
Tool or action	Order lookup, book search, return creation, checkout persistence	Delivered
Clarifying question	Missing order number, return reason, book category	Delivered
3-5 slide solution deck	Bookly-Decagon-solution-deck.pptx	Delivered
GitHub-ready run instructions	README.md and delivery checklist	Delivered
Production hardening	Auth, payment provider, idempotency, observability and human handoff	Documented as next step
